POLICE DEPARTMENT

GEORGE W. LEWIS, CHIEF

December 31, 1943.

Mr. Kermit Geary,
R. F. D. #2,
Walnutport,
Pennsylvania.

Dear Sir:

I was very happy to hear that you got our reception very clearly and quite frequently. Our antenna is put up in an "L" shape, the highest point being about 200' in the tower of the Town Hall. It runs south to an object 75' from the ground and then it runs north into the transmitter. We were instructed to have the antenna put up this way so as to hold the volume locally.

This transmitter is an RCA amateur set. It was repaired so that a crystal was attached and thereby made into a police transmitter. The voltage of this set is 40 watts.

We had this set installed in February 1937 and have had very good luck with it so far.

We do the broadcasting for the town of Barrington as well as Warren.

We have a population of approximately 8,000. and our police department consists of 4 patrolmen, a captain and a chief. We also have a reserve force of 16 men. We have two police cars and one motor cycle equipped with radios.

I am very glad to say that we have very little trouble in this town.

If you everhappen to be travelling toward Newport, R. I., you will find Warren on the main artery to the Mt. Hope Bridge. I do hope you will come in to see me and I will be glad to show you our transmitter.

Yours very truly,

George W. Lewis.

George W. Lewis,
Chief of Police.

From Station WPIA.
